Education

University of Pennsylvania

Philadelphia, PA

M.S.E. in Computer and Information Science; GPA: 3.78

Aug 2025 – May 2027

- **Relevant Coursework:** Applied Machine Learning, Operating Systems, Big Data Analytics, Natural Language Processing, Internet and Web Systems (Spring 2027)

University of Utah

Salt Lake City, UT

B.S. in Computer Science, Honors; GPA: 3.81

Aug 2021 – May 2025

- Dean's List – All Semesters
- **Relevant Coursework:** Artificial Intelligence, Machine Learning, Database Systems, Algorithms, Computer Systems

Skills

Languages:	JavaScript, Python, TypeScript, Java, SQL/MySQL, HTML/CSS, C++, C#, C
Mobile & Frontend:	React Native, React, Vite, Adobe React Spectrum, TestFlight distribution
Backend & APIs:	Node.js, .NET, REST APIs, HTTPClient
AI Development:	Claude, Claude Skills, Model Context Protocol (MCP), Cursor, LLM APIs
Tools & Platforms:	Git, Docker, Xcode, VS Code, Visual Studio, PyCharm, Postman
Additional Skills::	Fluent Speaker in English, Japanese, and Chinese

Experience

Adobe

San Jose, CA

Returning Software Engineer Intern

May 2026 – Aug 2026

- Delivered a **React Native mobile experience** for one of Adobe's enterprise AI products, integrating **3** backend data sources into a unified feed to proactively surface relevant, user-configurable alerts to customers.
- Developed a new voice agent worker modeled on an existing implementation, saving an estimated **3 weeks** of setup and earning a live demonstration to **Senior leadership (Multiple VP's)**; integrated speech-to-text, LLM-powered workflows, and text-to-speech in partnership with the infrastructure-owning team.
- Accelerated personal development velocity by nearly **2×** by leveraging **Claude, Claude Skills, and MCP** for codebase exploration, debugging, documentation retrieval, and implementation in a large production codebase

Adobe

San Jose, CA

Software Engineer Intern

May 2025 – Aug 2025

- Developed an **AI-powered Chrome Extension** using React and Vite that summarized webpage content in real time through LLM-powered contextual analysis; core functionality was later featured at **Adobe Summit. (U.S. patent application, Filed May 2026)**
- Collaborated with **10+** stakeholders, including designers, product managers, and engineers to deliver a feature-complete MVP for internal evaluation and future product exploration.

Fidelity Investments

Salt Lake City, UT

Full Stack Software Engineer Intern

Jun 2024 – Aug 2024

- Built an internal web application using Angular, JavaScript, HTML, and Fidelity UI components to modernize enterprise document workflows.
- Developed a solution projected to save **millions of dollars** annually by reducing manual paperwork and operational overhead; presented the project to senior leadership.

Projects

ShopU (School Project)

Python, React, Node.js, JavaScript, Git | Sep 2024 – Apr 2025

- Built a full-stack social commerce platform for college students as a senior capstone project, delivering an end-to-end MVP tested with **8** early pilot users in a five-person Agile team.
- Developed an ML-based ranking algorithm using TF-IDF and boosting, improving precision and recall over a chronological baseline to better surface listings matching user-selected interests.

Patents

- **U.S. Patent Application, Adobe** – Co-inventor on a patent application filed May 2026 for a context-aware AI assistance capability developed during Summer 2025 Software Engineering Internship.
